Work Experience

SDE II - [Amazon](#)

Bengaluru, KA

January 2024 - Present

> 2 years, 7 months

- Worked with Amazon Business Payment teams to provide **virtual cards** as a payment method in collaboration with MasterCard for Amazon Business customers along with spend limits, access control.
- Involved in agentic solution for **wallet externalization** (for payment using ChatGPT, Gemini, etc.) and life-cycle of various payment methods like **Pay by Invoice, Co-Branded CC**.
- Built search solutions for Amazon Business invoices worth **\$722B+** across **36m+** transactions.
- Worked in Device Analytics Services (DAS) with teams involved in data security, privacy, and troubleshooting platforms for more than **150 million** Amazon Devices.
- Responsible for ingestion pipeline for Amazon Device Logs. Worked on projects ranging from logs availability, spamming, volume, pattern finding and search (keyword and pseudo-semantic).
- Collaborated and built LLM/GenAI products and **RAG systems** to automate troubleshooting for devices through proactive signal detection and agent skills based SOPs and context engineering. These systems later scaled for customer feedback monitoring, customer support and developer productivity.
- Created common code multi platform streaming SDKs (for cloud and devices) for files management, encryption and decryption, which handle approximately **35,000 TPS**, managing **60 TB** of data per day.
- Helped new hires and teammates onboard to the team and technologies and mentored interns throughout their duration. Conducted regular code/design reviews and participated in talent evaluations, hackathons to maintain high engineering standards.
- **Tech stack:** Java, C, C++, Rust, AWS

Software Engineer - [Quicko](#)

Ahmedabad, GJ

June 2023 - December 2023

7 months

- Developed and scaled features for bookings, plans and order management, enabling **<40** tax experts to conduct **2,000+** individual tax filings across India during the 2023 tax filing season.
- Developed **multi-threaded** Tax P&L APIs with asynchronous workflows to have resilient architecture for Domestic and Foreign assets trading data for variety of assets (equity, MFs, ETFs, bonds)
- Drove conversations with multiple external businesses and stakeholders around use cases and product integration with **>60%** conversion rate.
- **Tech stack:** Java - Spring Boot, Typescript, Flutter, NodeJS

Software Engineer (Intern) - [Stockal](#)

Remote - Bengaluru, KA

January 2022 - July 2022

7 months

- Worked on systems for transaction data processing and calculations to reduce Ops manual work to 0%, 3P integration for tax statements and providing the same to service partners and clients
- Worked on stock **prices** to provide APIs for ticker price data for multiple features and calculations and candlestick **charts for technical analysis** using [TradingView advance charting library](#)
- Worked on data migration, streaming and common code-base to reduce rewriting of code across multiple projects.
- **Technologies Used:** *DB* → TimescaleDB, AWS RDS, MongoDB, Redis | *Backend* → NodeJS, Python, Golang | *Others* → AWS, Pandas

Technical Skills

Languages	Java, Python, C, C++, JavaScript, GoLang, Rust, CUDA
Databases	DynamoDB, PostgreSQL, MongoDB, Redis, TimescaleDB
Frameworks	Next JS, Express JS, Spring Boot
Systems	Linux, AWS, Digital Ocean, Heroku
Tools	Postman, Terraform, Listmonk

Education

Bachelor of Technology - Computer Science and Engineering, Indian Institute of Information Technology, Raichur CGPA: 8.58/10.00	July 2019 — June 2023
